TECHNICAL SKILL

NODEJS

ExpressJS, HAPI, NestJS, Typescript, KoaJS

PHP

Yii2, Lavarel

FRONTEND FRAMEWORK

ReactJS, NextJS, VueJS, AngularJS, Ionic 3

UNIT TEST & END-TO-END TEST

Mocha, Jest

UI TESTING

Storybook

DATABASE

- SQL (PostgreSQL, MySQL)
- No SQL (MongoDB, Redis, Couchbase)

DEVOPS

- Platforms & Systems: Google Cloud, AWS, Private Cloud, Firebase, Docker, Docker Swarm, Kubernetes, Traefik
- CI/CD: Bitbucket Pipeline, Gitlab, Github Actions

ENGLISH SKILL

- Speaking & Listening
- Working proficiency: Intermediate

SOFT SKILL

- Problem Solving

TRẦN VĂN NHÚT

FULL-STACK WEB DEVELOPER

PROFESSIONAL SUMMARY

- 7+ years of experience in Backend and Frontend development.
- Strong skill of NodeJS (7+ years), AngularJS, VueJS, ReactJS
- Have experience working with big clients from Singapore, Vietnam, United states such as: Indigo, CareHealth, Daikin Vietnam, CII JSC, OSH Vietnam, GCO, Evizi.
- Strong and solid knowledge and skills in Backend and Frontend development.
- Strong problem-solving, communication and teamwork skills.
- Have a lot of experience as a technical leader.
- Love learning new technologies and working in a highly dynamic, flexible, hyper productive agile team.

EDUCATION

🎓 **UNIVERSITY OF INFORMATION TECHNOLOGY // 2013 - 2018**

University

Software Engineering

WORK EXPERIENCE

🏢 **SENIOR FULL-STACK WEB DEVELOPER // JAN 2023 - PRESENT**

CareHealth

1/ Project name: CareHealth

Role: Backend developer

Project Description: Develop healthcare services and wellness solutions patient-centered, seamless, and accessible anywhere.

Responsibilities:

- Design DB.
- Requirements analysis.
- Design and create APIs.
- Release management.
- Monitor system and optimized system serve concurrent users.
- Trace bugs and fix bugs during operational process.

Skill & Technology:

- Docker
- NodeJS (NestJS)
- Micro - services
- Scaleable and load balancer using Kubernetes
- Services AWS (S3, SQS, SNS, Event Bridge)

🏢 **SENIOR FULL-STACK WEB DEVELOPER // NOV 2020 - DEC 2022**

Nexlab

1/ Project name: DAIKIN

Client: Daikin Vietnam

Role: Backend Team Lead

Project Description: Daikin VN app include 2 version app for customer and technician.

- Customer app helps users book a service to repair, maintain or install the air-conditioner of Daikin or another brand.

- Teamwork
- Time Management
- Good Presentation skill
- Creativity
- Mentoring Skill
- Technical and Document Writing
- Leadership Skill
- High Responsibility
- Team Management Skill

● Technician app helps technicians of Daikin receive the booking, and track the progress of working so they can lessen paperwork by using their phone to proceed.

Responsibilities:

- Design DB.
- Requirements analysis.
- Design and create APIs.
- Server deployment management.
- Lead all Backend developers.
- Monitor system and optimized system serve concurrent users
- Build project code base
- Build infrastructure

Skill & Technology:

- Docker
- Hasura GraphQL
- NodeJS (ExpressJS, Apollo Server, Typescript)
- Micro - services
- Scalable and load balancer using Docker Swarm, Master-slave PostgresSQL

2/ Project name: CC Core

Client: CII JSC

Role: Full-stack developer

Project Description: CC Core helps CII, a top infrastructure investment company in Vietnam, drastically increase project efficiency and accountability by streamlining and mobilizing project communications and documentation.

Responsibilities:

- Design DB.
- Requirements analysis.
- Design and create APIs.
- Server deployment management.
- Build structure core for project

Skill & Technology:

- Google Cloud
- NodeJS (ExpressJS)
- Firebase
- OneSignal
- VueJS
- Typescript
- Serverless (Cloud function)

3/ Project name: Web builder

Client: GCO

Role: Full-stack developer

Project Description: Implemented a Software as a Service (SAAS) solution aimed at enabling users to effortlessly create and manage landing pages and shop pages. The system facilitates customer registration, empowering them to customize pages according to their preferences and adjust various settings related to web pages.

Responsibilities:

- Developed full-stack web applications

Skill & Technology:

- Docker
- Hasura GraphQL
- Golang (Gin)
- VueJS, NextJS
- Typescript
- Server deployment management.

4/ Project name: Daikin Edu

Client: Daikin Vietnam

Role: Backend developer

Project Description: Developing an application designed to train technicians and streamline course management processes. The app will provide a comprehensive platform for training programs, enabling efficient management of courses and ensuring a seamless experience for technicians undergoing training

Responsibilities:

- Design DB
- Lead team backend
- Requirements analysis.
- Build project code base

Skill & Technology:

- Docker
- Hasura GraphQL
- Nodejs (ExpressJS, Apollo Server, Typescript)

4/ Project name: Jbee

Client: GCO

Role: Backend developer

Project Description: Creating a service booking system tailored for household needs, specializing in scheduling and managing services such as house cleaning and repairs. The system aims to simplify the process for users seeking these services, providing a user-friendly platform for efficient booking and management of home-related tasks.

Responsibilities:

- Design DB
- Design and create APIs.

Skill & Technology:

- Docker
- Hasura GraphQL
- Golang (Gin)

FULL-STACK WEB DEVELOPER // OCTOBER 2018 - November 2020

User

1/ Project name: Orchxtra

Client: Singapore

Role: Full-stack developer

Project Description: Developing a comprehensive system designed to facilitate the management of students' projects for professors. This system will streamline project-related tasks, allowing professors to efficiently oversee and coordinate student projects. Key functionalities include project tracking, progress monitoring, and communication tools to enhance collaboration between professors and students throughout the project lifecycle.

Responsibilities:

- Design and create APIs.
- Developed web application

Skill & Technology:

- NodeJS (KoaJS)
- Docker
- AngularJS 6
- Magento 2
- AWS (EC2, APIs Gateway, S3, Cognito)

2/ Project name: SoundFyr

Client: Singapore

Role: Backend developer

Project Description: Creating a social media platform with essential features for user interaction. This project includes functionalities such as the ability to follow other users, upload images and videos, and engage through comments. The platform aims

to provide a dynamic and interactive space for users to connect, share multimedia content, and foster meaningful conversations.

Responsibilities:

- Design and create APIs.
- Design DB
- Build project code base

Skill & Technology:

- NodeJS (ExpressJS, Typescript)
- AWS (Lambda, API Gateway, S3, Cognito, Lambda)
- MongoDB

3/ Project name: CMA

Client: Singapore

Role: Backend developer

Project Description: Developing an online learning platform coupled with gamified elements tailored for children. This project integrates educational content with interactive games to make the learning experience engaging and enjoyable for kids. The platform will encompass a variety of subjects, fostering a playful environment that encourages curiosity and knowledge retention among young learners

Responsibilities:

- Design and create APIs.
- Design DB
- Build project code base

Skill & Technology:

- NodeJS (ExpressJS, Typescript)
- AWS (Lambda, API Gateway, S3, Cognito)
- MySQL

4/ Project name: Indigo

Client: Singapore

Role: Backend developer

Project Description: Creating a comprehensive learning system with a focus on providing a robust educational experience. This system will incorporate features such as user-friendly interfaces, diverse course offerings, interactive assessments, progress tracking, and collaborative tools. The goal is to offer an effective and engaging platform that caters to various learning styles and supports continuous knowledge acquisition.

Responsibilities:

- Design and create APIs.
- Design DB
- Build project code base

Skill & Technology:

- NodeJS (ExpressJS, Apollo Server, Typescript)
- Hasura GraphQL
- AWS (EC2, ECR, CloudFront)

5/ Project name: MJX

Client: US

Role: Full-stack developer

Project Description: Creating an e-commerce website dedicated to the trading of stimulants, featuring secure transactions, detailed product listings, user profiles, and an intuitive interface.

Responsibilities:

- Developed web application
- Fix bugs and enhancement of old features

Skill & Technology:

- IONIC 3
- AngularJS 6

- PHP (Laravel)

6/ Project name: CPQ

Client: US

Role: Frontend developer

Project Description: Constructing a management system for streamlined project oversight in construction. Features include scheduling, resource allocation, budget tracking, and collaboration tools for efficient communication among stakeholders.

Responsibilities:

- Building UI and integrate APIs
- Fix bugs and enhancement of old features

Skill & Technology:

- AngularJS 6
- PHP (Laravel)

FULL-STACK WEB DEVELOPER // JUNE 2017 - May 2018

ADdress

1/ Project name: GiaDinhTre

Role: Full-stack developer

Project Description: Developing a family-focused project featuring a magazine and community platform. The initiative aims to offer informative and entertaining content while fostering a sense of community through shared experiences and activities.

Responsibilities:

- Develop web application
- Design DB
- Build project code base
- Server development management

Skill & Technology:

- NodeJS (ExpressJS)
- SocketIO
- ReactJS
- MySQL, Redis

2/ Project name: Lofficial Video

Role: Full-stack developer

Project Description: Building a web platform for video content, featuring video viewing and a curated video listing for easy exploration

Responsibilities:

- Develop web application
- Design DB

Skill & Technology:

- NodeJS (ExpressJS)
- SCSS
- Pug
- MySQL, Redis

FULL-STACK WEB DEVELOPER // Junly 2016 - June 2017

NEXX

I learned much knowledge such as microservice, design pattern for backend, socket.io and had an opportunity in working with PostgreSQL, MongoDB.

1/ Project name: GiupViecNha

Role: Backend developer.

Project Description: Project about cleaning on demand service.

Responsibilities:

- Design and create APIs

- Design DB
- Requirements analysis.

Skill & Technology:

- NodeJS (HAPI)
- Micro-service Apache Thrift
- PostgresSQL
- OAuth2

2/ Project name: DTaxi

Role: Backend developer.

Project Description: Taxi booking service follow Uber model and Grab model.

Responsibilities:

- Design and create APIs

Skill & Technology:

- NodeJS (HAPI)
- Micro-service
- MongoDB
- PostgresSQL

3/ Project name: PACIFICLINES

Role: Full-stack developer

Project Description: Project about forwarding and logistic for PACIFICLINES

Responsibilities:

- Develop web application

Skill & Technology:

- PHP(Yii2)
- HTML, CSS, JQuery, Bootstrap

4/ Project name: NEXXID

Role: Full-stack developer

Project Description: Manage all of user in authentication service

Responsibilities:

- Develop web application

Skill & Technology:

- ReactJS
- NodeJS (HAPI)

5/ Project name: COKOOL

Client: Cokool Store

Role: Full-stack developer

Project Description: This is an E-Commerce project about clothes

Responsibilities:

- Design DB.
- Developed full-stack web applications

Skill & Technology:

- AngularJS 1.5
- PHP (Yii2).

 **WEB DEVELOPER // Feb 2016 - July 2016**

LAB of UIT

1/ Project name: Laws

Role: Full-stack developer

Project Description: Government project in the field of Law.

Responsibilities:

- Develop web application

Skill & Technology:

- Ruby on Rails
- AngularJS 1.5
